PAPERS CONTAINED IN THE VOLUMES OF TRANSACTIONS.

From Vol. 47 (1905) to Vol. 54 (1912) inclusive.

VOL. 47 (1905).

PART I.

Spring Meeting, London, April, 1905.

		PAGE
The design of the Antarctic exploration vessel *Discovery* ...	W. E. SMITH ...	1
The armoured cruisers *Kasuga* and *Nisshin*, of the Imperial Japanese Navy ...	COLONEL N. SOLIANI ...	43
The Russian volunteer fleet ...	HERBERT ROWELL ...	63
The strength of ships, with special reference to experiments and calculations made upon H.M.S. *Wolf* ...	PROFESSOR J. H. BILES ...	80
The influence of the proportions and forms of ships upon their longitudinal bending movements among waves ...	F. H. ALEXANDER ...	116
Some experiments on structural arrangements in ships ...	J. BRUHN ...	126
Model experiments on hollow *versus* straight lines in still water and among artificial waves ...	R. E. FROUDE ...	158
The effect of acceleration on ship resistance ...	C. E. STROMEYER ...	178
The effect of motion ahead on the rolling of ships...	A. W. JOHNS ...	186
Some results of model experiments in deep and in shallow water ...	S. POPPER ...	199

PART II.

Margins and factors of safety and their influence on marine designs ...	A. E. SEATON...	203
Notes on the variation of angular velocity in the shafting of marine engines ...	J. H. HECK ...	220
A method of preventing vibration in certain classes of steamships ...	A. MALLOCK ...	227
The Admiralty course of study for the training of naval architects ...	E. L. ATTWOOD ...	231
Submarine signalling by means of sound ...	J. B. MILLET ...	256

Summer Meeting, London, July, 1905.

Naval strategy and tactics at the time of Trafalgar...	ADMIRAL SIR CYPRIAN BRIDGE...	273
The ships of the Royal Navy as they existed at the time of Trafalgar ...	SIR PHILIP WATTS ...	285
The classification of merchant shipping (illustrated by a short history of Lloyd's Register) ...	H. J. CORNISH ...	316
Experiments with models of constant length and form of cross sections, but with varying breadth and draught ...	LIEUT.-COL. G. ROTA...	334
Experiments on the effect of depth of water on speed, having special reference to destroyers recently built ...	HAROLD E. YARROW ...	339
Deductions from recent and former experiments on the influence of the depth of water on speed ...	W. W. MARRINER ...	344
Fractures in large steel boiler plates ...	J. T. MILTON ...	359
A comparison of the performances of turbines and reciprocating engines in the Midland Railway Company's steamers ...	W. GRAY ...	392
Notes on the causes of accidents to submarine boats and their salvage...	CAPTAIN R. H. BACON ...	406
Obituary Notice : Mr. G. L. Watson ...	...	424

VOL. 48 (1906).

Spring Meeting, London, April, 1906.

		PAGE
The new scouts	ADMIRAL C. C. FITZGERALD	1
Vessels constructed for service in our colonies and protectorates	SIR EDWARD REED	19
Yacht racing measurement rules and the International Conference	R. E. FROUDE	56
The speed of motor-boats and their rating for racing purposes	LINTON HOPE	82
The design and construction of high-speed motor-boats	JAMES A. SMITH	92
Gas engines for ship propulsion	J. E. THORNYCROFT	105
The efficiency of surface condensers	PROFESSOR R. L. WEIGHTON	123
Notes on the freeboard rules	J. FOSTER KING	157
The overhead wire cableway applied to shipbuilding	J. L. TWADDELL	170
The introduction of cranes in shipyards	ALEXANDER MURRAY	179
Oil-tight work in ships of light construction	HERBERT ROWELL	196
Steam yachts: Some comparisons	J. R. BARNETT	207
Obituary notices:		
Monsieur V. Daymard		218
Mr. Alfred Morcom		220
Mr. Henry William Brock		222

VOL. 49 (1907).

Spring Meeting, London, March, 1907.

The influence of machinery on the gun power of the modern warship	J. McKECHNIE	1
Safe submarine vessels and the future of the art	SIMON LAKE	37
On some points of interest in connection with the design, building, and launching of the *Lusitania*	W. J. LUKE	65
The evolution of the modern cargo steamer	S. J. P. THEARLE	91
Cranes for shipbuilding berths	C. PIAGGIO	114
Torsiometers as applied to the measurement of power in turbines and reciprocating engines	ARCHIBALD DENNY	121
Torque of propeller shafting: Some investigations and results	J. HAMILTON GIBSON	126
Propeller struts	G. SIMPSON	145
Experiments with Dr. Schlick's gyroscopic apparatus for steadying ships	SIR WILLIAM WHITE	157
Approximate formulæ for determining the resistance of ships	A. W. JOHNS	181
The application of the integraph to some ship calculations	J. G. JOHNSTONE	198
The causes and prevention of fire at sea	PROFESSOR V. B. LEWES	221
Modern floating docks	LYONEL CLARK	238
Some phases of the fuel question	PROFESSOR V. B. LEWES	256

Summer Meeting, Bordeaux, June, 1907.

Some practical points in the application of the marine steam turbine	THE HON. C. A. PARSONS AND H. WHEATLEY RIDSDALE	271
Structural development in British merchant ships	J. FOSTER KING	287
Further results of submarine signalling by means of sound	J. B. MILLET	300
On the use of hydraulic riveting in the construction of the *Mauretania*	E. W. DE RUSETT	308
Obituary notices:		
Sir E. J. Reed		313
Monsieur A. Normand		318
Mr. G. C. Mackrow		320
Mr. G. Stanbury		322
Mr. H. H. West		324
Mr. Walter Brock		325
Mr. G. R. Dunell		327

VOL. 50 (1908).

Spring Meeting, London, April, 1908.

		PAGE
Unsinkable and uncapsizable ships of the Goulaeff form and system of construction	GENERAL E. E. GOULAEFF	1
Modern armour and its attack	CAPTAIN T. J. TRESIDDER	25
Modern torpedo boats and destroyers	J. E. THORNYCROFT	59
The combination system of reciprocating engines and steam turbines	THE HON. C. A. PARSONS AND R. J. WALKER	77
Speed trials and service performance of the Cunard turbine steamer *Lusitania*	THOMAS BELL	96
A new system of ship construction	J. W. ISHERWOOD	115
The heating of modern ocean liners	W. CARLILE WALLACE	138
The influence of air on vacuum in surface condensers	D. B. MORISON	150
Note on the use of superheated steam with marine engines	FELIX GODARD	172
Results of further model screw propeller experiments	R. E. FROUDE	185
An analysis of the resistance of ships	PROFESSOR W. HOVGAARD	205
A new method of research work on fluid resistance and ship propulsion	H. WELLENKAMP	225
Two notes on ship calculations	W. S. ABELL	242
Factors of safety in marine engineering	PROFESSOR J. O. ARNOLD	260
The modern developments of the mariner's compass	J. C. DOBBIE	290
A contribution to the history of ironclads (1854–1865)	EARL OF ROSSE	303
Obituary notices :		
The Marquis of Linlithgow		315
Mr. John Corry		318
Mr. John Macfarlane Gray		319
Mr. Henry Frederick Swan		320
Mr. Robert Thompson		322
Mr. John Wigham Richardson		323

VOL. 51 (1909).

Spring Meeting, London, March and April, 1909.

Types of warships omitted in recent programmes of naval construction	LORD BRASSEY	1
Standardisation. A report on the work done by the Engineering Standards Committee on sections and tests for materials used in the construction of ships and their machinery	ARCHIBALD DENNY	10
The vibrations of ships and the use of a dynamical model for determining the elasticity of ships	PROFESSOR J. B. HENDERSON	29
Some considerations on the application of internal combustion engines for marine propulsion	H. C. ANSTEY	47
Internal combustion engines for submarines	F. R. S. BIRCHAM	55
The propulsion of ships by means of contrary turning screws on a common axis	LIEUT.-COL. G. ROTA	77
Notes on a mechanical method for determining the thrust of propellers	J. H. HECK	87
Description of the suction dredger *Leviathan*, recently constructed for the port of Liverpool	ANTHONY G. LISTER AND W. BOYD	100
The turbine passenger steamer *Ben-my-Chree*, and practical experience of the Parsons marine steam turbine	C. J. BLACKBURN	116
Explosions of steam pipes due to water hammer	C. E. STROMEYER	129
Report of the Experimental Tank Committee (1908)	R. T. GLAZEBROOK	144
On the resistance of thin plates and models in a current of water	T. E. STANTON	164

		PAGE
Speed-trials of H.M. torpedo-boat destroyer *Cossack* at Skelmorlie and the Maplin Sands	SIR PHILIP WATTS	176
The accelerated motion of bodies in water, with special application to the rolling of ships	A. W. JOHNS	179
On launching calculations, with special reference to the effect of camber	JOHN SMITH	198
A note on ship geometry	SIR GEORGE GREENHILL	214
Some points in connection with shipbuilding on the Great Lakes, U.S.A.	PROFESSOR HERBERT C. SADLER	220
The influence of form and bulkheads on the strength of ships	J. BRUHN	233
Diverging waves	PROFESSOR W. HOVGAARD	251
Obituary notices :		
Dr. F. Elgar		267
Mr. F. K. Barnes		271
Monsieur M. Berrier-Fontaine		274

VOL. 52 (1910).

Spring Meeting, London, March, 1910.

The battleship of the future	REAR-ADMIRAL R. H. S. BACON	1
Report on the progress of the National Experimental Tank	R. T. GLAZEBROOK	22
An account of the Society for the Improvement of Naval Architecture	A. W. JOHNS	28
Experimental investigations on wake and thrust deduction values	W. J. LUKE	43
Some considerations regarding the phenomena of propulsion	PROFESSOR J. B. HENDERSON	58
Model screw propeller results : a comparison	T. B. ABELL	71
A new method of ascertaining the weight of cargoes on board ship	A. MURRAY	107
Motor lifeboats of the Royal National Lifeboat Institution	J. R. BARNETT	112
The application of the internal combustion engine to fishing and commercial vessels	LINTON HOPE	120
The substitution of the electric motor for marine propulsion	W. P. DURTNALL	140
The application of the marine steam turbine and mechanical gearing to merchant ships	HON. C. A. PARSONS	168
Notes on the measurement of shaft horse power	PROFESSOR B. HOPKINSON	184
The brittleness of mild steel due to nitrogen	C. E. STROMEYER	193
Obituary notices :		
Mr. James Dixon		201
Mr. W. J. Bone		202
Mr. G. B. Rennie		204

VOL. 53 (1911).

PART I.

Spring Meeting, London, April, 1911.

The problem of size in battleships	PROFESSOR J. J. WELCH	1
Twelve months' experience with geared turbines in the cargo steamer *Vespasian*	HON. C. A. PARSONS AND R. J. WALKER	29
The National Experimental Tank and its equipment (Part I.)	G. S. BAKER	37
Diesel engines for sea-going vessels	J. T. MILTON	53
The influence of longitudinal distribution of weight upon the bending moments of ships among waves	F. H. ALEXANDER	103
Considerations affecting local strength calculations	J. MONTGOMERIE	118
The acceleration in front of a propeller	R. E. FROUDE	139
An investigation into the stresses in a screw propeller blade	ENG.-LIEUT. A. TURNER	172
Results of trials of the anti-rolling tanks at sea	H. FRAHM	183
Steering-gear experiments on the turbine yacht *Albion*	H. S. HELE-SHAW AND F. LEIGH MARTINEAU	217
Description of a stability and trim indicator	S. B. RALSTON	240

		PAGE
General propositions and diagrams relating to the balancing of the four-cylinder marine engine	C. E. INGLIS	248
The determination, by photo-elastic methods, of the distribution of stress in plates of variable section, with some applications to ships' plating	PROFESSOR E. G. COKER	265
Notes on a new design of merchant vessel	M. BALLARD	297
Obituary notices :		
Earl Cawdor		313
Mr. David Dunlop		316
Mr. James Riley		318

VOL. 53 (1911).

PART II.

Jubilee Meeting, London, July, 1911.

History of the Institution of Naval Architects and of scientific education in naval architecture	SIR WILLIAM H. WHITE	1
Fifty years' architectural expression of tactical ideas	ADMIRAL SIR CYPRIAN BRIDGE	34
Progress of naval construction in Japan	REAR-ADMIRAL M. KONDO	50
Result of experimental tank tests on models of submarines	MASON S. CHACE	61
The rational application of turbines to the propulsion of warships	A. C. E. RATEAU	71
The marine steam turbine from 1894 to 1910	HON. SIR C. A. PARSONS	79
Fifty years' changes in British warship machinery	ENG. VICE-ADMIRAL SIR HENRY J. ORAM	96
Our present knowledge of the vibration phenomena of steamers	DR. O. SCHLICK	121
The development of merchant shipbuilding in Japan	DR. S. TERANO AND MR. M. YUKAWA	135
Fifty years' developments in mercantile ship construction	DR. S. J. P. THEARLE	149
Shipping on the Great Lakes	FRANK E. KIRBY AND A. P. RANKIN	163
Recent developments in the sea transportation of Swedish ore	J. JOHNSON	179
Design and service performance of the Transpacific liners *Tenyo Maru* and *Chiyo Maru*	DR. S. TERANO AND PROF. SHIBA	184
Progress of naval engineering in Japan	ENGINEER-REAR-ADMIRAL T. FUJII	193
The scientific study of naval architecture in Germany	PROFESSOR O. FLAMM	201
Some further notes on cavitation	S. W. BARNABY	219
Notes on the collapsing of curved beams and curved elastic strips	PROFESSOR L. A. MARBEC	233
Fifty years' progress in shipbuilding in Italy	COLONEL G. RUSSO	252
Progress in naval artillery (1860 to 1910)	SIR ANDREW NOBLE	279
Warship building (1860 to 1910)	SIR PHILIP WATTS	291
Armour for ships (1860 to 1910)	CHARLES E. ELLIS	338

VOL. 54 (1912).

Spring Meeting, London, March, 1912.

Some military principles which bear on warship design	ADMIRAL SIR REGINALD CUSTANCE	1
Turning circles	PROFESSOR W. HOVGAARD	23
The law of comparison for surface friction and eddy-making resistances in fluids	T. E. STANTON	48
The William Froude national tank (Part II.)	G. S. BAKER	58
Results of trials of the Diesel-engined sea-going vessel *Selandia*	I. KNUDSEN	68
Gas power for ship propulsion	A. C. HOLZAPFEL	88
The effect of bilge keels on the rolling of lightships	G. IDLE AND G. S. BAKER	103
Results of calculations regarding the effect of an internal fluid upon the initial stability and the stability at large angles in ships of various forms	A. CANNON	124

		PAGE
The Solignac-Grille boiler and its application in French Channel steamers ...	G. HART	145
Results of experiments with a watertube boiler, with special reference to superheating	HAROLD E. YARROW	159
Geared turbine Channel steamers *Normannia* and *Hantonia*	PROFESSOR J. H. BILES	175
Performance on service of the Channel steamer *Newhaven*	P. SIGAUDY	189
The measurement and automatic recording of dead reckoning	F. R. S. BIRCHAM	193
Description of a tide indicator	COMMANDER G. J. BAUGH	206
The arrangement of boat installations on modern ships	A. WELIN	211
Torsional vibrations of elastic shafts of any cross section and mass distribution, and their application to the vibration of ships	PROFESSOR DR. L. GÜMBEL ...	219
Load-extension diagrams obtained photographically with an automatic self-contained optical load-extension indicator	PROFESSOR W. E. DALBY	231
Obituary notices:		
Admiral Sir John Dalrymple Hay	... ...	239
Rear-Admiral Melville, U.S.N.	... ...	242
Mr. James Dunn	... ...	244
Mr. John Ward	... ...	246
Monsieur Widmann	... ...	247

NOMINAL INDEX

Vol. 47 (1905) to Vol. 54 (1912)

Names of Authors and Speakers, titles of papers and number of Volumes, are printed in heavy type.

References to discussion on papers and the number of pages are in ordinary type.

References to obituary notices, elections on the Council, &c., are given in *Italics*.

NOTE.—Roman numerals **i** and **ii** (heavy type) given after certain volume numbers refer to Parts I and II respectively of those volumes.

Abell, T. B.
- **Model Screw Propeller Results: A Comparison** **52,** 71
- Shape of propeller blades **52,** 101
- Cavitation in tank experiments **52,** 101
- *Awarded Premium* (1911) .. ... **53, i,** xliv

Abell, Professor W. S.
- **Two Notes on Ship Calculations** **50,** 242
- Number of ordinates needed to integrate a given function **50,** 258
- Position of metacentric curves **50,** 258
- Moments of inertia calculations **50,** 259
- *Awarded Premium* (1909) ... ... **51,** xxxiv
- Calculation of resistance of bilge keels **51,** 194
- Effect of immersion on bilge keels **51,** 195
- Launching calculations and the effect of camber **51,** 210
- Problem of wake movement **52,** 94
- Outward *versus* inward turning screws ... **52,** 94
- Formula for thrust obtained from theoretical considerations **52,** 94
- Unreliability of small tank model experiments **54,** 64
- Analysis of rolling of lightships **54,** 117

Abrahams, M. S.
- Diesel engines on SS. *Vulcanus* ... ... **53, i,** 85
- Forced lubrication and Fuel consumption **53, i,** 86

Achelis, F.
- Experience with submarine signalling apparatus **49,** 307
- Proposing vote of thanks, Bordeaux Congress **49,** 310

Acland, Captain F. E. D.
- Steering gears tried on steam yacht *Albion* **53, i,** 235

Acland, Vice-Admiral Sir W. A. D., Bart., C.V.O.
- *Elected Associate Member of Council* (1906) ... **48,** xli

Aiton, J. A.
- Water hammer experiments with steam pipes **51,** 140

Alexander, F. H.
- **The Influence of the Proportions and Form of Ships upon their Longitudinal Bending Moments among Waves** ... **47, i,** 116
- Variation in distribution of weights ... **47, i,** 125
- Course of study at the Royal Naval College and at Durham University ... ... **47, ii,** 253
- Suggested formulæ determining ship resistance **49,** 197
- Advantages of motor engines for fishing boats **52,** 134
- **The Influence of Longitudinal Distribution of Weight upon the Bending Moments of Ships among Waves** ... ... **53, i,** 103
- Angles of pitching at sea ... ... **53, i,** 116
- Methods of calculating ships' stresses at sea **53, i,** 117
- Ayre-Ballard type of ship... ... ... **53, i,** 310

Allan, J. M.
- Application of the combination of turbines and reciprocating engines to slow-speed cargo boats **50,** 88
- Engines for Japanese ships ... ... **53, ii,** 200
- Practical and theoretical training in naval architecture ... ... **53, ii,** 214
- Use of superheat with marine boilers **54,** 171
- Loss due to astern turbine when at full speed ahead **54,** 184

Allen, C. E.
- *Appointed on Lloyd's Technical Committee* (1912) **54,** xxxvi

Angier, Sir Theodore.
- Turbine engines for merchant vessels **49,** 282

Anstey, H. C.
- **Some considerations on the Application of Internal Combustion Engines for Marine Propulsion** **51,** 47
- Relative weights of steam and gas engines **51,** 72, 75

Anstey, H. C.—*continued.*
Awarded Premium (1910) ... ... **52,** xxxiv
Application of internal combustion engines to fishing vessels **52,** 136
Formula for ascertaining the required pitch of propeller **52,** 137
Table of constants for various types of ship ... **52,** 138
Archer, John.
Gas installations for marine propulsion... ... **54,** 96
Arnold, Professor John Oliver.
Factors of Safety in Marine Engineering **50,** 260, 287, 289
Armstrong, Lord.
Elected Associate Member of Council (1907) ... **49,** xlvii
Attwood, E. L.
Metacentric height of *Daring* ... ... **47, i,** 196
The Admiralty Course of Study for the Training of Naval Architects ... **47, ii,** 231
Lectures in naval architecture to officers at Greenwich ... ... **47, ii,** 254
Formulæ for area of propeller struts **49,** 151
Formulæ for determining the resistance of ships **49,** 193
Use of the integraph for ship calculations ... **49,** 216
Bacon, Rear-Admiral R. H. S., C.V.O., D.S.O.
Submarine signalling and submarine boats **47, ii,** 263
Practice of consulting naval opinion on warship design ... ... **47, ii,** 303
Limitations of speed in Nelson's time ... **47, ii,** 304
Notes on the Causes of Accidents to Submarine Boats and their Salvage **47, ii,** 406
Longitudinal stability of "A 8" ... ... **47, ii,** 420
Model experiments with submarines ... **47, ii,** 421
Precautions against accidents in submarines **47, ii,** 422
The Battleship of the Future **52,** 1
Value of the *Dreadnought* type of battleship **52,** 17
Functions of submarines in warfare **52,** 21
Growth of size of battleships ... ... **53, i,** 24
Principles underlying tactics in naval warfare **53, ii,** 44
Tribute to Sir Andrew Noble ... ... **53, ii,** 289
Effect of heavy gun fire in action **54,** 22
Bain, James.
Elected Member of Council (1907) ... ... **49,** xlvii
Baird, A. W.
Advantages of the Kelvin dry compass **50,** 299
Baker, G. S.
Effect of wake on propeller efficiency **51,** 83
Relation between hull efficiency and prismatic coefficients **52,** 94
Effect of webbing upon stream-lines **52,** 95
The National Experimental Tank and its Equipment (Part I.) ... ... **53, i,** 37
Baker, G. S.—*continued.*
Calculation of rudder pressures **54,** 44
Law of similarity in model experiments on frictional resistance **54,** 54
The William Froude National Tank (Part. II) **54,** 58
Value of model experiments in a small tank ... **54,** 65
Dr. Stanton's law for the correction of surface friction of small models **54,** 66
The Effect of Bilge Keels on the Rolling of Lightships **54,** 103
Analysis of resistance to rolling **54,** 120
Comparison of results with those of *Devastation* **54,** 121
Ballard, Maxwell.
Notes on a New Design of Merchant Vessel **53, i,** 297
Saving in materials in SS. *Edenor* ... **53, i,** 311
Barnaby, Sir Nathaniel, K.C.B.
Italian naval construction ... ... **47, i,** 60
Education of naval architects ... ... **47, ii,** 246
Elected Honorary Vice-President (1905) **47, ii,** 271
Alteration of rules for the election of the Council ... ... **49,** xxxi
Congratulating the new President (the Marquis of Bristol) ... ... **53, ii,** 28
Barnaby, S. W.
Effect of shallow water on trial speeds... **47, ii,** 352
Effect of gyroscopic action on steering of ships **49,** 173
Formulæ for determining ship resistance ... **49,** 195
Speed of destroyers of River class and Tribal class compared **50,** 71
Effect of depth of water on speed **50,** 72
Velocity of wake for various types of ships ... **52,** 84
Outward *versus* inward turning screws... ... **52,** 85
Comparison of Froude's and Taylor's methods **52,** 85
Mr. Froude's and Professor Henderson's views on theory of propeller action ... **53, i,** 156
Dr. Hele-Shaw's steering gear on steam yacht *Albion* ... ... **53, i,** 233
Practical training for naval architecture students... ... ... **53, ii,** 212
Some Further Notes on Cavitation ... **53, ii,** 219
"Accepted" theory of cavitation... ... **53, ii,** 229
Observations on cavitation experiments **53, ii,** 232
Value of model experiments in a small tank ... **54,** 65
Boilers of the French T.B.D. *Kabyle* **54,** 156
Barnett, J. R.
Yacht scantlings and registration societies ... **48,** 75
Steam Yachts: Some Comparisons **48,** 207
Stability of steam yachts **48,** 215
Limits of stiffness suitable for steam yachts ... **48,** 216
Motor Life Boats of the Royal National Lifeboat Institution... ... ... **52,** 112
Paraffin *versus* petrol for motor engines ... **52,** 133

Barnes, F. K.
Elected Honorary Vice-President (1905) ... **47, ii,** 271
Obituary Notice **51,** 271
Barry, Sir John Wolfe, K.C.B., LL.D., F.R.S.
Experimental tank for the National Physical Laboratory **51,** 157
Bates, E. P.
Proposing vote of thanks at Bordeaux Congress **49,** 310
Baugh, Commander G. J., R.N.R.
Measurement and recording of dead reckoning **54,** 203
Description of a Tide Indicator ... **54,** 206, 210
Beardmore, W.
Effect of shearing and flanging upon steel plates **47, ii,** 389
Trefilage process of casting steel ingots **47, ii,** 390
Bell, Thomas.
Elected Member of Council (1908) ... ... **50,** xliii
Range of temperature in cylinders of engines and in turbines **50,** 88
Appointed on Lloyd's Technical Committee (1912) **54,** xxxvi
Appointed on Lloyd's General Committee of Management (1912)... ... ... **54,** xxxvi
Speed Trials and Service Performance of the Cunard turbine steamer "Lusitania" **50,** 96, 114
Appointed on Engineering Standards Committee (1909) ... ... **51,** xxxiv
Beresford, Admiral Lord Charles, G.C.B., G.C.V.O.
Tribute to the engineer *personnel* under the old system ... ... **53, ii,** 112
Engine-room complement in recent ships **53, ii,** 116
Berrier-Fontaine, M.
Obituary Notice **51,** 274
Bertin, E.
Welcoming the members at the Bordeaux Congress **49,** 266, 310
Goulaeff type of warships... ... ... **50,** 12
Design of the *Henri IV.* **50,** 12
Congratulations to the Institution on attaining its Jubilee ... ... **53, ii,** 29
Bevis, R. R.
Elected Member of Council (1907) ... ... **49,** xlvii
Experiments with flash-light torsion meter ... **49,** 141
The use of turbines in combination with reciprocating engines **50,** 88
Biles, Professor J. H., LL.D.

Risks from fire with oil engines **54,** 84

Willett, H. G.
Date of earliest bilge keels on Trinity House lightships **54,** 122

Wilson, Admiral of the Fleet, Sir A. K., V.C., G.C.B.
Elected Associate Member of Council (1911) **53, i,** lv

Wilson, Professor C. A. Carus, M.A.
Professor Coker's method of measuring stresses ... ... **53, i,** 289
Determination of lines of stress within the elastic limit ... ... **53, i,** 290
Analogy between stream-lines and lines of stress .. .. **53, i,** 291
Wilson, J. S.
Messrs. Wilson & Gore's method of measuring stresses... ... ... **53, i,** 291
Stresses in masonry dams measured by model experiments ... ... **53, i,** 293
Wingfield, C. H.
Effect of shallow water on speed ... **47, ii,** 356
Effect of wind on wire cableway system ... **48,** 190
Design of propeller struts **49,** 151
Use of pallograph for measuring vibration ... **51,** 44
Formula for weight of propelling machinery ... **51,** 67
Effect of immersion on propeller efficiency ... **51,** 82
Features of turbine engine design and working **51,** 126
Case of burst feed pipe on H.M.S. *Blake* ... **51,** 142
Experiment showing effect of rotation due to screw propeller **52,** 89
Reason of increased hull efficiency with smaller propellers **52,** 90
Stresses in screw propeller blades ... **53, i,** 181
Dr. Hele-Shaw's variable stroke pump in steering gear ... ... **53, i,** 235
Wisnom, Eng. Comm. W. M.
Elected on British Corporation Technical Committee (1910) ... ... **52,** xxxiv
Yarrow, A. F.
Effects of buckling and tensional strains compared ... ... **47, i,** 110
Necessity for a deep water measured mile near the Thames ... ... **47, ii,** 350
Yarrow, A. F.—*continued.*
Gift to establish national experimental tank **50,** xxxiv
Appointed on the Advisory Committee to the "William Froude Tank" (1910) ... **52,** xxxiv
Appointed on the General Board of the National Physical Laboratory ... ... **52,** xxxiv
Progress of the national experimental tank ... **52,** 27
Lubrication of geared turbines ... ... **53, i,** 33
Completion of the national experimental tank **53, i,** 51
Yarrow, Harold E.
Experiments on the Effect of Depth of Water on speed having special reference to Destroyers recently built ... ... **47, ii,** 339
Posts formerly erected on the Goodwin Sands **47, ii,** 356
Awarded Premium (1906) ... ... **48,** xxxiii
Progress of the national experimental tank ... **52,** 27
Results of Experiments with a Water-Tube Boiler, with Special Reference to Superheating... ... ... **54,** 159
Efficiency of boilers with superheaters... ... **54,** 172
Dr. Schmidt's superheater **54,** 174
Yates, J. A.
Deflections in ships' structures ... ... **47, i,** 112
Young, Andrew.
Advantage of channel frame arrangement **47, i,** 154
Value of intercostals ... ... **47, i,** 155
Young, J. Denholm.
Plotting wake values from steam trial results ... **52,** 104
Younger, A. Scott, B.Sc.
Test pressures for boilers—Longevity of boilers **47, ii,** 213
Designs of engines and testing propeller shafts **47, ii,** 214
Fractures in large boiler plates—Effect of riveting ... ... **47, ii,** 387
Yukawa, M.
Development of Merchant Shipbuilding in Japan ... ... **53, ii,** 135

SUBJECT INDEX

Vol. 47 (1905) to Vol. 54 (1912).

Titles of Papers, Names of Authors, and Numbers of Volumes are printed in heavy type.

Under each of the principal headings are given, firstly, the list of papers chiefly relating thereto, arranged in chronological order ; and secondly, references either to papers or to discussions, classified alphabetically.

NOTE.—Roman numerals i and ii (heavy type), given after certain Volume numbers, refer to Parts I and II respectively of those Volumes.

A1 and *A8* (Submarines), accidents to. *See under* "Submarines."
Adder, H.M.S., trials of ... ... **47, ii,** 353
Adventure, H.M.S. scout, particulars of **48,** 2
Ahlborn (Professor), photographs of revolving screw **52,** 93
Air pumps. *See under* "Condensers."
Aki and *Kurama*, particulars of ... ... **53, ii,** 54
Albion, steam yacht. *See under* "Steering and Steering Gears."
Amethyst, H.M.S., trials of. *See under* "Engines (Turbine)."
Antrim, S.S., fuel consumption ... ... **47, ii,** 394
Archer, H.M.S., trials of **54,** 161

ARCTIC SHIPS.

On the design of the Antarctic exploration vessel "Discovery" ... W. E. Smith, C.B. 47, i, 1
Arctic ships, early examples of ... ... **47, i,** 40
Discovery, bilge keels of ... ... **47, i,** 7
— Committee of the Royal Geographical Society ... ... **47, i,** 3
— engines of ... ... **47, i,** 17
— form of stern ... ... **47, i,** 6
— hull specification ... ... **47, i,** 19
— magnetic observatory on ... ... **47, i,** 5, 8
— propelling machinery and boilers... **47, i,** 12
— rudder of ... ... **47, i,** 8
— sail area of old and new *Discovery* ... **47, i,** 14
Suggestions for improvements in the next ship for Antarctic work ... ... **47, i,** 13
Argonaut, early submarine **49,** 40, 43
Armament. *See* "Guns and Gun Mountings."

ARMOUR AND ARMOUR-PLATES.

Modern armour and its attack. Capt. T. J. Tresidder, C.M.G. 50, 25
Armour for Ships (1860–1910). C. E. Ellis 53, ii, 338
Armour-plate manufacture, history of ... **53, ii.** 36
— — — in Japan ... ... **53, ii,** 58
Backing of plates, effect of **50,** 45

ARMOUR AND ARMOUR-PLATES—*continued.*
Capped projectiles, action of **50,** 52, 57
— — invention of **50,** 29
Compound armour, introduction of ... **53, ii,** 341
Critical velocities of projectiles **50,** 31
Development of armour, minimum thickness required **54,** 8, 19
Early armourclads ... ... **50,** 303 ; **53, ii,** 293
Fairbairn's formula for the perforation of wrought iron **50,** 36, 56
Figure of merit, or factor of perforation **50,** 40, 49
Gun *v.* armour **52,** 3, 18
Hard-faced armour, liability to crack ... **50,** 31, 49
Harvey nickel steel plate ... ...**53, ii,** 343, 347
Inflexible, armour of ... ... **53, ii,** 340
Italian method of armour attachment ... **47, i,** 60, 62
— armour-plates ... ... **53, i,** 261
Kasuga and *Nisshin*, armour of ... ... **47, i,** 46
Krupp plates, trial of ... ... **53, ii,** 344
— — value of **50,** 47, 54
Obliquity of impact, effect of **50,** 35
Penetration and perforation defined **50,** 26
Projectiles in collision with plates, stress diagrams of **50,** 41
Punching experiments, table of **50,** 46
— — in backed plates **50,** 36, 50
Rolled armour, introduction of ... ...**53, ii,** 339, 346
Scouts, armour protection of **48,** 11
Armstrong College, research work at **48,** 147
Artillery. *See* "Guns."
Auxiliary Cruisers. *See* "Mercantile Cruisers."
Beaufoy's experiments. *See* under "Experimental Tank" and "Resistance of Ships."
Ayre-Ballard ship construction ... ... **53, i,** 308

Badger and *Beaver*, geared turbines of **54,** 182
Balancing of engines. *See* "Vibration of Steamers."

Battleships. *See* "Warships."
Ben-my-Chree, performance of. *See under* "Engines (Turbine)."
BILGE KEELS.
The effect of bilge keels on the rolling of lightships. ... G. Idle and G. S. Baker 54, 103
Effect of bilge keels when under way ... **47, i,** 190
Effect of variation in depth and position of bilge keels... ... ... **54,** 106, 115
Introduction of bilge keels in Trinity House lightships... ... ... **54,** 116, 122
Lightships, bilge keels for... ... ... **54,** 103
Revenge, H.M.S., bilge keels of **51,** 183
See also "Rolling and Pitching of Ships."
Black Prince, H.M.S. ... ... **53, ii,** 97, 294
Blake, H.M.S., explosion on **51,** 142
BOARD OF TRADE.
Advisory Committee to the Board of Trade Representatives (I.N.A.) appointed **49,** xxxviii; **51,** xxxiv; **52,** xxxiv; **54,** xxxvi
Consultative Committee, Representatives on **52,** xxxiv; **54,** xxxvi
Inspection of boilers ... ... **47, ii,** 206
Reports on explosions **51,** 136
BOAT-LOWERING GEAR.
The arrangement of boat installations on modern ships ... ... A. Welin 54, 211
Boat-lowering on new large liners ... 54, 213, 216
Combined coal and boat hoists **54,** 214
Olympic and *Titanic* boat installation **54,** 212
Welin davits... ... ... **54,** 211, 217
Brackets (propeller). *See under* "Propellers."
BOILERS.
Margins and factors of safety and their influence on marine designs. A. E. Seaton 47, ii, 203
Fractures in large steel boiler plates. J. T. Milton 47, ii, 359
The Solignac-Grille boiler and its application in French Channel steamers ... G. Hart 54, 145
Admiralty Boiler Committee's Report ... **47, i,** xliii
Anti-priming plates in boilers of *Ben-my-Chree* **51,** 127
British Corporation inquiry into test pressures for boilers ... ... **47, ii,** 212
Cold water test for boilers ... ... **47, ii,** 215
Corrosion of boilers and factor of safety **47, ii,** 213, 218
Experiments on model boilers **54,** 146, 156
Factor of safety, Admiralty practice ... **47, ii,** 216
— — in relation to speed ... ... **47, ii,** 208
See also under "Testing of Materials."
Fuel consumption with Yarrow boilers ... **54,** 160, 172
Heat transmission in boilers, experiments on **54,** 169
BOILERS—*continued.*
Japanese naval boilers ... ... **53, ii,** 193, 199
Lagraffel d'Allest boilers **54,** 151
Life of boilers... ... ... **47, ii,** 213
Oil fuel in Japanese steamers ... ... **53, ii,** 185
Solignac-Grille boilers on T.B.D. *Kabyle* and S.S. *Pas de Calais* **54,** 149
Steel used for boilers. *See under* "Steel for Shipbuilding."
Superheaters with water-tube boilers. *See under* "Superheaters."
Temperature experiments with Yarrow boilers **54,** 163, 166
Testing does not injure boilers ... ... **47, ii,** 214
Turbinia, boiler trials of **54,** 166
Boiler plate. *See under* "Steel for Shipbuilding."
Borodino, performance of **50,** 3, 15
Bow rudder. *See under* "Rudders."
Brighton, Channel steamer, engines of ... **47, ii,** 402
Britannia, H.M.S., superheating on... ... ... **50,** 179
British Corporation, I.N.A. representatives on Technical Committee ... ... **52,** xxxiv
— — inquiry into test boiler pressures ... **47, ii,** 212
BULKHEADS.
The influence of form and bulkheads on the strength of ships ... ... J. Bruhn 51, 233
Bulkhead Committee's (1891) report, influence of ... ... **53, ii,** 155
"Goulaeff," ships, subdivision of ... **50,** 2, 16
Lusitania, bulkheads of **49,** 70
Testing bulkheads in oil-tank ships ... **48,** 196, 202
See also "Strength of Ships."

Cæsarea and *Sarnia*, details of **54,** 176
CALCULATIONS (Ships).
Two notes on ship calculations. W. S. Abell 50, 242
A note on ship geometry. Sir George Greenhill 51, 214
Approximate area of curves, method of finding **50,** 242
Approximate integration, rules for **50,** 250
Integraph, uses of **49,** 200
See also under "Integrators."
Launching calculations. *See under* "Launching."
Metacentric diagram, approximate construction for **50,** 250
Moment of inertia, calculations for *Lusitania* **49,** 77
Simpson's, Tchebyscheff's and Gauss' methods compared **50,** 244, 255
Stability calculations. *See under* "Stability."
— and trim indicator ... ... **53, i,** 240
Stresses on ships at sea. *See under* "Strength of Ships."

CALCULATIONS (Ships)—*continued.*
See also "Integrators," "Stability," and "Strength of Ships."
Capitaine. *See under* "Engines (Internal Combustion)."
Carbon, S.S., construction of **51,** 233, 250
Cargo-boats. *See under* "Mercantile Steamers."
CARGOES AND STOWAGE.
A new method of ascertaining the weight of cargoes on board ship... ... A. Murray 52, 107
Careless stowage as affecting safety of ships **48,** 166, 167
Great Lakes (U.S.A.), stowage of cargo-steamers ... ... **53, ii,** 163
Porhydrometer, invention of **52,** 106
Caulking. *See under* "Riveting."
Centre of buoyancy and of gravity. *See under* "Stability."
Chain cables, Engineering Standards Sub-committee on **51,** 22
Channel steamers. *See* "Mercantile (Channel) Steamers."
Charter of Incorporation. *See under* "Institution of Naval Architects."
Chiodagata, early Japanese vessel ... ...**53, ii,** 136, 142
Chiyo Maru, performance of. *See under* "Mercantile (Mail and Passenger) Steamers."
City of Paris, anti-rolling tanks on ... ... **53, i,** 206
CLASSIFICATION OF SHIPS.
The classification of merchant shipping (illustrated by a short history of Lloyd's Register) ... ... H. J. Cornish 47, ii, 316
Inspection and classification of machinery **47, ii,** 324
Isherwood system of construction and the classification societies **50,** 122, 127
Table showing number of vessels classed by the various Registration Societies ... **47, ii,** 331
Coal consumption. *See under* "Engines" and "Trials of Steamers."
Coal and boat-hoists combined **54,** 214
Colonies, vessels for. *See under* "Shallow-draught Vessels."
Combustion engines (internal). *See under* "Engines (Internal Combustion)."
COMPASSES.
The modern developments of the mariner's compass ... ... J. C. Dobbie 50, 290
Compensating magnets, use of **50,** 291, 298
Deviations of *Discovery's* compasses ... **47, i,** 17
Kelvin's compass **50,** 299
Liquid compasses, early forms of **50,** 292
Composite ships, classification of ... ... **47, ii,** 333
— — early vessels ... ... **53, ii,** 157
CONDENSERS.
The efficiency of surface condensers. Professor R. L. Weighton 48, 123
The influence of air on vacuum in surface condensers ... ... D. B. Morison 50, 150
Air pump, capacity and efficiency ... **50,** 154, 158
— — experiments **48,** 125
Armstrong College, tests of condensers at ... **50,** 150
Baffle plates in condensers **48,** 155
"Contraflo" condenser, description **48,** 123
— — tests of **50,** 170
Surface condenser, introduction of ... **53, ii,** 100, 118
Trials of condensers **48,** 127
Tables of temperature and pressure **50,** 161
Thermal efficiency of old and new condensers **48,** 134, 150
Vacuum augmentor (Parsons') **47, ii,** 393; **50,** 79, 87, 93
— production, economy in **48,** 135
Weir's condenser of 1879... ... ... **48,** 151, 154
Congress (International). *See under* "Institution of Naval Architects."
Corcovado, S.S., rolling of ... ... **53, i,** 186
Corrosion of turbine blades. *See under* "Engines (Turbine)."
Cossack, H.M.S., trials of. *See under* "Torpedo-boats and Destroyers."
Cranes in shipyards. *See under* "Shipyard Equipment."

Daring, T.B.D., rolling of ... ... **47, i,** 194
Davits. *See under* "Boat-lowering Gear."
Dead reckoning, measurement of. *See under* "Speed of Ships."
Delfin, submarine, accident to ... ...**47, ii,** 408, 417
Depth of water, effect of. *See under* "Resistance of Ships."
Destroyers. *See* "Torpedo-boats."
Devastation, H.M.S., rolling of **54,** 118
Diesel engines. *See under* "Engines (Internal Combustion)."
Discovery (Antarctic vessel). *See under* "Arctic Ships."
DOCKS (FLOATING).
Modern floating docks ... ...Lyonel Clark 49, 238
Aberdeen floating dock **49,** 252
Austrian floating dock at Pola **49,** 242
Barcelona depositing dock ... **49,** 239, 253, 255
Bermuda and Dewey floating docks compared **49,** 245
Corrosion of floating docks **49,** 248
Dewey type of floating dock **49,** 241, 253
Hamburg floating docks **49,** 238, 243
Hansson type of floating dock **49,** 244
Havana type of floating dock **49,** 240

DOCKS (FLOATING)—*continued.*
"Limpet" for repairing floating docks... ... **49,** 249
"Rennie" type of floating dock **49,** 239
Stresses in floating docks **49,** 251
Vessels of great beam, dock accommodation for **50,** 11, 21
Dockyards. *See* "Shipbuilding" and "Shipyard Equipment."
Donegal, Channel steamer, particulars of ... **47, ii,** 394
Dreadnought, H.M.S. *See under* "Warships."
DREDGERS.
Description of the suction dredger "Leviathan," recently constructed for the port of Liverpool...Anthony G. Lyster and W. Boyd 51, 100
Dredging in U.S.A. **51,** 101, 109
Leviathan, description of **51,** 103
Working speed of dredging **51,** 108, 112

Edenor, S.S., construction of ... ... **53, i,** 298, 311
EDUCATION AND TRAINING OF NAVAL ARCHITECTS AND MARINE ENGINEERS.
The Admiralty course of study for the training of naval architects E. L. Attwood 47, ii, 231
The history of the Institution of Naval Architects and of scientific education in naval architecture ... Sir W. H. White 53, ii, 1
The scientific study of naval architecture in Germany ... ... Professor O. Flamm 53, ii, 201
American and French courses of study in naval architecture ... ...**53, ii,** 211, 213
Committee on Engineering Education, report of ... ... **53, ii,** 210
Employment in shipyards, vacancies open **53, ii,** 214
German course of study at Charlottenburg University... ... ... **47, ii,** 251 ; **53, ii,** 201, 209
Glasgow University, training at... ... **47, ii,** 253
Japanese naval constructors, education of **53, ii,** 56, 60
Keyham, course in naval engineering ... **47, ii,** 232
Newcastle and Liverpool Universities, chair of naval architecture ... ...**47, ii,** 249, 252
Portsmouth School of Naval Architecture **47, ii,** 231
Royal Corps of Naval Constructors, salaries in **47, ii,** 250
Royal Naval College (Greenwich), examination marks ... ... **47, ii,** 241
— — — exclusion of foreign students... **47, ii,** 252
— — — list of graduates ... ... **47, ii,** 242
— — — mathematical training at ... **47, ii,** 247
— — — private students at ... ...**47, ii,** 234, 248
— — — successes of former students ... **47, ii,** 249
— — — syllabus of course at ... ... **47, ii,** 237
Scholarships. *See under* "Institution of Naval Architects."
See also "Naval Architecture."

Elastic limit of steel. *See under* "Testing of Materials."
Electrical appliances. *See* "Engines (Electrical)."
Elorn, rolling of **51,** 179, 184
Engineering Standards Committee, representatives (I.N.A.) on ... ... **51,** xxxiv, 11
ENGINES.
Fifty years' changes in British warship machinery.
Eng. Vice-Admiral Sir Henry Oram 53, ii, 96
Progress of naval engineering in Japan.
Eng. Rear-Admiral T. Fujii 53, ii, 193
Admiralty Committee (1858) on warship engines, report of ... ... **53, ii,** 111
Balancing of engines. *See under* "Vibration of Steamers."
Engine-room personnel in H.M. ships ...**53, ii,** 116, 118
Inspection and classification of machinery **47, ii,** 324
Introduction of the compound engine ... **53, ii,** 100
Japanese navy, engines in ... ...**53, ii,** 194, 199
Mallock's governor, description of ... **47, ii,** 227
Oil fuel, Lassoe burners for ... ... **53, ii,** 187
— — consumption in Japanese steamers **53, ii,** 191
Russian Volunteer Fleet, engines of ... **47, i,** 70
Table of particulars of naval engines (1850–1910) ... ... **53, ii,** 112
Triple expansion and turbine engines compared **50,** 79
Warrior, engines of ... ... **53, ii,** 97
ENGINES (Electrical).
The substitution of the electric motor for marine propulsion ... W. P. Durtnall 52, 140
Del Proposto engine **51,** 56
Electric transmission of power. *See under* "Engines (Internal Combustion) and (Turbine)."
Electric propulsion experiments... ... ... **50,** 114
— — History of **52,** 143
Hydraulic-electric steering gear. *See under* "Steering and Steering Gears."
"Paragon" system of propulsion ... **52,** 146, 155
— — — efficiency of **52,** 160
ENGINES (Internal Combustion).
Gas engines for ship propulsion.
J. E. Thornycroft 48, 105
The influence of machinery on the gun power of the modern warship ... J. McKechnie 49, 1
Some phases of the fuel question.
Professor V. B. Lewes 49, 256
Some considerations on the application of internal combustion engines for marine propulsion ... ... H. C. Anstey 51, 47
Internal combustion engines for submarines
F. R. S. Bircham 51, 55

ENGINES (Internal Combustion)—*continued.*

Motor lifeboats of the Royal National Lifeboat Institution ... J. R. Barnett 52, 112

The application of the internal combustion engine to fishing and commercial vessels. Linton Hope 52, 120

Diesel engines for sea-going vessels. J. T. Milton 53, i, 53

Results of trials of the Diesel-engined sea-going vessel "Selandia" ... I. Knudsen 54, 68

Gas power for ship propulsion. A. C. Holzapfel 54, 88

Alcohol vapour, advantages of **49,** 260

Capitaine engine. *See below under* "Gas Engines."

Clutches in use for submarine engines **51,** 61

Del Proposto engine **51,** 56

Diesel engine accidents, possibility of ... **54,** 82, 85

— — air compressors ... ... **53, i,** 98 ; **54,** 69

— — auxiliaries ... ... **53, i,** 66, 85 ; **54,** 74, 78

— — cost of upkeep ... ... **53, i,** 95

— — cross-head *v.* trunk piston... ... **53, i,** 82

— — cylinders, number of ... ... **53, i,** 65, 81

— — engine room space... ... ... **54,** 80

— — for marine work ... **48,** 114, 121 ; **53, i,** 53

— — for motor boats **52,** 130

— — for submarines **51,** 55, 57, 69

— — fuel consumption **53, i, 57** ; **54,** 70, 73, 79, 86

Isherwood system of construction for oil tankers **50,** 122
Japan, merchant shipbuilding in ... **53, ii,** 135
— *Chiyodagata*, first wooden steamship built in ... ... **53, ii,** 136, 142
Japanese mercantile marine, tables of tonnage ... ... **53, ii,** 145
Oil-tight work in ships of light construction ... **48,** 196
Ore carrying vessels, *Voltrath Thaw* and *Sir Ernest Cassel* ... ... **53, ii,** 182
Trunk ships, Messrs. Ropner's **49,** 295
"Turret" ships, Messrs. Doxford's ... **49,** 294, 298
Turret and trunk steamers, effect of, on design **49,** 110
Shelter deck steamers **49,** 96
Single-deck ships, early examples of **49,** 293
Three-island steamers **49,** 95
Well-deck steamers **49,** 94

MERCANTILE STEAMERS (Channel Steamers).
A comparison of the performances of turbines and reciprocity engines in the Midland Railway Co.'s steamers. W. Gray 47, ii, 392

MERCANTILE STEAMERS (Channel Steamers) —*continued.*
The turbine passenger steamer "Ben-my-Chree," and practical experience of the Parsons' marine steam turbine. C. J. Blackburn 51, 116
The geared turbine channel steamers "Normannia" and "Hantonia." Professor J. H. Biles 54, 175
Performance on service of the Channel steamer "Newhaven"... ... P. Sigaudy 54, 189
Antrim and *Donegal*, steam consumption of, compared to *Londonderry* and *Manxman* **47, ii,** 394
Ben-my-Chree, description of **51,** 116
Brighton, results of turbine efficiency ... **47, ii,** 402
Cæsarea and *Sarnia*, details of **54,** 176
Fuel consumption in Channel steamers ... **54,** 191
Manœuvring powers of Channel steamers **47, ii,** 398
S.S. *Newhaven*, performance of **54,** 189
Normannia and *Hantonia*, geared turbines of **54,** 179
Queen and *Invicta*, trials of ... ...**47, ii,** 399, 401
Turbine steamers. *See also under* "Engines (Turbine)."

MERCANTILE STEAMERS (Mail and Passenger).
On some points of interest in connection with the design, building, and launching of the "Lusitania" ... ... W. J. Luke 49, 65
Speed trials and service performance of the Cunard turbine steamer "Lusitania." Thomas Bell 50, 96
Design and service performance of the Transpacific liners "Tenyo Maru" and "Chiyo Maru"... S. Terano and C. Shiba 53, ii, 184
Buenos Ayrean, construction of **49,** 290
Great Eastern and *Lusitania*, construction of, compared **49,** 86, 289, 297
Great Lakes, U.S.A., passenger steamers on **53, ii,** 176
Heating of ocean liners. *See under* "Ventilation of Ships."
Lusitania, engines of **50,** 97
Mauretania, riveting in. *See under* "Riveting and Jointing."
Mauretania and *Lusitania*, launch of. *See under* "Launching."
Oil fuel in Japanese steamers ... ... **53, ii,** 185
Tenyo Maru and *Chiyo Maru*, details of **53, ii,** 184
Transatlantic ships, particulars of **49,** 65
Turbine steamers. *See also* "Engines (Turbine)."

Metacentre. *See under* "Calculations" and "Stability."
Miantonomoh, rolling of ... ... **53, i,** 213
Model experiments. *See under* "Experimental Tank" and "Resistance of Ships."

Motor-boats. *See under* "Engines (Internal Combustion)" and "Yachts (Motors)."
— Lifeboats. *See under* "Lifeboats."

NAVAL ARCHITECTURE.
The Admiralty course of study for the training of Naval Architects. E. L. Attwood 47, ii, 231
Account of the Society for the Improvement of Naval Architecture ... A. W. Johns 52, 28
History of the Institution of Naval Architects and of Scientific Education in Naval Architecture ... ... Sir W. H. White 53, ii, 1
Fifty years' architectural expression of tactical ideas ... Admiral Sir C. Bridge 53, ii, 34
The Scientific study of Naval Architecture in Germany ... ... Professor O. Flamm 53, ii, 201
Beaufoy's experiments. *See under* "Resistance of Ships"
Condition of Naval Architecture in 1860 **53, ii,** 2
Charlottenburg University course of Naval Architecture ... ... **47, ii,** 251 ; **53, ii,** 201
Naval architecture regulating tactics ... **53, ii,** 40
Naval construction in Japan ... ... **53, ii,** 50
Naval officer's views on warship construction **53, ii,** 42
Research work in Naval architecture **54,** 143
Royal Corps of Naval Constructors, foundation of ... ... **53, ii,** 29

Turbines (Rateau system), propellers for **53, ii,** 77
Twin screws of S.S. *Robert F. Stockton* ... **51,** 77, 84
— — on a common axis... ... ... **51,** 78, 82
Vibration, effect of, on efficiency of propellers **47, ii,** 223
See "Vibration of Steamers."
Wake and thrust deduction tabulated **52,** 52
— — formula for, value of **52,** 44, 83, 88
— — value plotted on a diagram **52,** 104
— — (negative) in curtain destroyers ... **52,** 84, 86
Wellenkamp's method of tank experiments on model propellers, ... **50,** 231
Wing screws and central screws, relative efficiency of **50,** 200

PROPULSION OF SHIPS.
A new method of research work on fluid resistance and ship propulsion.
H. Wellenkamp 50, 225
The propulsion of ships by means of contrary turning screws on a common axis.
Lieut.-Col. G. Rota 51, 77
Notes on a mechanical method for determining the thrust of propellers ... J. H. Heck 51, 87
Some considerations regarding the phenomena of propulsion.
Prof. J. B. Henderson 52, 58
The substitution of the electric motor for marine propulsion ... W. P. Durtnall 52, 140
See also "Engines," "Horse-Power," "Propellers" and "Resistance of Ships."
Pumps (air-pumps) for condensers. *See under* "Condensers."

Queen and *Invicta*, trials of ... ... **47, ii,** 399, 401

Rance, S.S., superheating on **50,** 174
Rattler, H.M.S., engines of, *See under* "Engines (Internal Combustion)."

Registration of ships. *See* "Classification of Ships" and "Lloyd's Register."

RESISTANCE OF SHIPS.
Model experiments on hollow *versus* straight lines in still water and among artificial waves ... ... R. E. Froude 47, i, 158
The effect of acceleration on ship resistance.
C. E. Stromeyer 47, i, 178
Some results of model experiments in deep and in shallow water... ... S. Popper 47, i, 199
Experiments with models of constant length and form of cross sections, but with varying breadth and draught.
Lieut.-Col. G. Rota 47, ii, 334
Experiments on the effect of depth of water on speed, having special reference to destroyers recently built.
Harold E. Yarrow 47, ii, 339
Deductions from recent and former experiments on the influence of the depth of water on speed ... W. W. Marriner 47, ii, 344
Approximate formulæ for determining the resistance of ships ... ... A. W. Johns 49, 181
An analysis of the resistance of ships
Professor W. Hovgaard 50, 205
A new method of research work on fluid resistance and ship propulsion
H. Wellenkamp 50, 225
On the resistance of thin plates and models in a current of water ... T. E. Stanton 51, 164
Experimental investigations on wake and thrust deduction values ... W. J. Luke 52, 43
Some considerations regarding the phenomena of propulsion.
Professor J. B. Henderson 52, 58
The law of comparison for surface friction and eddy-making resistances in fluids.
T. E. Stanton 54, 48
Afonasieff's formula **49,** 195
Ahlborn's experiments on resistance ... **51,** 181, 190
Beaufoy's experiments described and analysed **47, i,** 178 ; **52,** 34
— — results compared with Froude's **51,** 167
— — value of **50,** 226
Broad vessels, resistance of **50,** 3, 15
"County" Class, effect of alteration of lines **47, i,** 168, 173
Depth of water, influence on speed of torpedo-boats (H.M.S. *Cossack*, &c.) **50,** 68 ; **51,** 176
— — "critical depth" for any given speed **47, ii,** 345
— — hump in resistance curve due to shallow water ... ... **47, ii,** 340
— — model experiments on **51,** 159

RESISTANCE OF SHIPS—*continued.*
Model of dirigible balloon, resistance experiments on **54,** 50, 56
Eiffel Tower experiments on thin plates ... **54,** 56
Flow of water in pipes **54,** 49, 55
Form of ship in relation to resistance **50,** 215
Fournier's and Taylor's formulæ **49,** 186, 190, 196
Friction experiments with various fluids ... **54,** 50
Frictional resistance, law of comparison **54,** 48, 53
— — Lord Rayleigh's formula for ... **54,** 50, 56
— — to rolling when under way ... **47, i,** 187

Goulaeff vessels, resistance of **50,** 3, 15
Middendorf's formula for resistance ... **49,** 182, 196
Residuary resistance curves **49,** 188
— — calculation of **50,** 210
Results of experiments tabulated ... **50,** 214, 219
Small tank experiments on resistance **54,** 58
Speed in relation to length ... ... **47, i,** 176
— constant, selection of ... ... **47, ii,** 335
Stream line theory, nature of motion **51,** 191
— lines for submarines submerged and surface running ... ... **53, ii,** 67
Wave making, observations on **51,** 252
— — in ships, formation of **50,** 206, 224
Waves, artificial, experiments in ... **47, i,** 164
— bow and stern, interference of ... **47, ii,** 348
— character of, in shallow water ... **47, ii,** 346
Retvisan, performance of **50,** 3, 15
Revenge, H.M.S., experiments on. *See under* "Rolling of Ships."

RIVETING AND JOINTING.
On the use of hydraulic riveting in the construction of the "Mauretania."
E. W. De Rusett 49, 308
Allowances for rivet holes in calculating stresses **47, i,** 114
Lusitania, riveting of **49,** 68
Oil-tight work, caulking of joints in **48,** 197, 200, 204
— — — riveting of **48,** 196
Rivet holes, effect of, on strength of plates **53, i,** 284, 289
Strength of riveted attachments ... ... **47, i,** 129
S.S. *Robert F. Stockton*, twin screws of ... **51,** 77, 84

ROLLING AND PITCHING OF SHIPS.
The effect of motion ahead on the rolling of ships ... ... A. W. Johns 47, i, 186
Experiments with Dr. Schlick's gyroscopic apparatus for steadying ships
Sir William H. White 49, 157
The accelerated motion of bodies in water, with special application to the rolling of ships ... ... A. W. Johns 51, 179

ROLLING AND PITCHING OF SHIPS—*continued.*
Results of trials of the anti-rolling tanks at sea ... ... H. Frahm 53, i, 183
The effect of bilge keels on the rolling of lightships ... George Idle and G. S. Baker 54, 103
Anti-rolling tank experiments at Glasgow University ... ... **53, i,** 205
— — — on the *Ohio* and *City of Paris* **53, i,** 206
— — — model in S. Kensington Museum **53, i,** 215
— — — (Frahm's) on the *Ypiranga* and *Corcovado* ... ... **53, i,** 186
— — — (Watts's), on H.M.S. *Inflexible* **53, i,** 202, 212, 216
Beaufoy's experiments, deductions from, relating to rolling **51,** 180
Cremieu's (Professor) design for an anti-rolling pendulum ... ... **49,** 172; **53, ii,** 206, 209
Destroyer *Daring*, rolling of ... ... **47, i,** 194
Eddy-making and wave-making resistances to rolling ... ... **47, i,** 192
Elorn, rolling experiments on **51,** 179, 184
Devastation, rolling experiments on **54,** 118
Frictional resistance to rolling when under way ... ... **47, i,** 187
General, S.S., diagram of rolling... ... **53, i,** 201
Goulaeff ship, rolling of **50,** 7, 14, 20
Greyhound, H.M.S., rolling of **51,** 195, 197
Gyroscope for checking rolling. *See under* "Gyroscope."
Hercules, rolling of... ... ... **49,** 178
Inflexible, anti-rolling tank in ... **53, i,** 202, 212, 216
Lightships, rolling of ... ... **53, i,** 214; **54,** 103
Miantonomoh, rolling of ... ... **53, i,** 213
Navette and *Revenge*, experiments on ... **47, i,** 193
Revenge, H.M.S., rolling experiments on **47, i,** 193; **51,** 183, 195
Pendulum recorder for rolling ... ... **53, i,** 192, 213
Pitching, angle of, in large ships ... **53, i,** 116
— calculation of, stresses due to ... **53, i,** 105, 115
— vertical movement at ends of ship ... **47, i,** 120, 124
Waves, artificial, experiments in... ... ... **54,** 119
Royal Charter, incorporation by. *See under* "Institution of Naval Architects."
Royal Naval College. *See under* "Education of Naval Architects."
Royal Sovereign. *See under* "Warships."

RUDDERS.
Bow rudder for shallow draught vessel ... **48,** 54
Friction of rudder fitted with Dr. Hele-Shaw's gear ... ... **53, i,** 239
Pressure on rudder, formula for ... **54,** 26, 44
— — — model experiments on ... **51,** 166, 175
Rudders used in turning trials recorded ... **54,** 25

RUDDERS—*continued.*
Torpedo-boat rudders **50,** 62, 72
See also "Steering and Steering Gears."
Rules, alteration of. *See under* "Institution of Naval Architects."
Russian Volunteer Fleet. *See under* "Warships (Foreign)."

SAILS AND SAILING SHIPS.
Auxiliary engines for sailing boats ... **52,** 123, 132
Discovery (Antarctic vessel). *See under* "Arctic Ships."
Motor engines in fishing boats. *See under* "Engines (Internal Combustion)."
Sail area of the old and new Antarctic ships
Discovery ... ... **47, i,** 14
Structural features of sailing ships **49,** 288

SALVAGE.
Notes on the causes of accidents to submarine boats and their salvage.
Capt. R. H. Bacon 47, ii, 406
Admiralty and salvage plant ... ... **47, ii,** 415
Effect of depth of water on salvage of submarines ... ... **47, ii,** 414
Suggestions for salvage of submarines ... **47, ii,** 412
Sarnia, channel steamer, details of **54,** 176
Scholarships. *See under* "Institution of Naval Architects."
Scouts. *See under* "Warships, Cruisers."
See Bar, rolling experiments on **49,** 157
Selandia, oil-engined ship. *See under* "Engines (Internal Combustion)."

SHAFTS (Propeller).
Notes on the variation of angular velocity in the shafting of marine engines.
J. H. Heck 47, ii, 220
Torsiometers as applied to the measurement of power in turbines and reciprocating engines ... ... Archibald Denny 49, 121
Torque of propeller shafting: some investigations and results ... J. Hamilton Gibson 49, 126
Notes on a mechanical method for determining the thrust of propellers
J. H. Heck 51, 87
Calibration of shafts **52,** 184, 192
Diesel engine shafts, design of ... **53, i,** 69, 76, 92
Double shafts for contrary turning screws ... **51,** 80
Factors of safety for shafts ... ... **47, ii,** 213
See under "Testing of Materials."
Flexible couplings for shafts **51,** 89, 98
Mr. Heck's apparatus, description of ... **47, ii,** 224
Propeller struts **49,** 145
Revolving shafts, experiments with **51,** 95

SHAFTS (Propeller)—*continued.*
Rigidity of shafts, measurement of ... **52,** 184, 190
— effect of longitudinal stress upon **52,** 186
Stresses in propeller shafts **49,** 126, 132
Torque of propeller shafting **49,** 126
Torsiometers, use of, on trials **49,** 121, 129, 133; **52,** 184
Vibration of shafts. *See under* "Vibration of Steamers."

SHALLOW-DRAUGHT VESSELS.
Vessels constructed for service in our colonies and protectorates Sir Edward J. Reed 48, 19
Bow rudder for shallow-draught vessel ... **48,** 54
Goliath (tug), trials of **48,** 29, 53
Gunboats and passenger vessels for Uganda and Lake Nyassa **48,** 22
Manœuvring of shallow-draught vessels **48,** 45, 53
Motor vessels, shallow-draught **52,** 127
Overdraught due to faulty conditions of loading **48,** 25, 52, 55
Paddle-steamers for Trinidad **48,** 26
Restriction of draught **48,** 45, 53
Screw-in-tunnel steamers for colonial service ... **48,** 38
Steam launches for colonial service **48,** 46
— lifeboat for colonial service **48,** 39
— tugs for Barbadoes and Colombo **48,** 27
Stern-wheel steamers and canoes for the Niger **48,** 30
Tugs in Colombo Harbour **48,** 53
Uganda, shallow-draught steamers, erection of **48,** 24
Shikishima, particulars of ... ... **53, i,** 4, 16, 20

SHIPBUILDING.
A new system of ship construction.
J. W. Isherwood 50, 115
Some points in connection with shipbuilding on the Great Lakes (U.S.A.).
Professor H. C. Sadler 51, 220
Notes on a new design of merchant vessel.
M. Ballard 53, i, 297
Progress of naval construction in Japan.
Rear-Admiral M. Kondo 53, ii, 50
The development of merchant shipbuilding in Japan. S. Terano and M. Yukawa 53, ii, 135
Fifty years' developments in mercantile ship construction ... S. J. P. Thearle 53, ii, 149
Shipping on the Great Lakes (U.S.A.).
F. E. Kirby and A. P. Rankin 53, ii, 163
Fifty years' progress of shipbuilding in Italy.
Col. G. Russo 53, ii, 252
Ayre-Ballard method of ship construction **53, i,** 300
Courses in shipbuilding at Charlottenburg **53, ii,** 204
See "Education of Naval Architects."
Lake steamers (U.S.A.), cost of ... **51,** 227, 231

SHIPBUILDING—*continued.*
Shipbuilding Encouragement Act of 1896 in Japan ... ... **53, ii,** 139, 146
See also "Naval Architecture," "Strength of Ships," and "Warships."
SHIPYARD EQUIPMENT.
The overhead wire cableway applied to shipbuilding ... ... J. L. Twaddell 48, 170
The introduction of cranes in shipyards. Alexander Murray 48, 179
Cranes for shipbuilding berths. C. Piaggio 49, 114
Cranes for shipyards, comparison of types **48,** 182; **49,** 117, 120
— cost and upkeep of **48,** 184, 188
— in German shipyards **49,** 118
— speed of travel **48,** 187
Derricks, objections to use of **48,** 171
Electricity for motive power **48,** 172
Japanese shipyards, equipment ... ... **53, ii,** 144
Riva (Italy) shipyard, equipment of **49,** 115
Shipyard installations in Germany ... **48,** 182, 194
— — comparative cost of **48,** 178
Trade Union restrictions in shipyards **48,** 193
Wire ropeways and cranes in U.S.A. ... **48,** 177, 189
— — cost of upkeep **48,** 176
— — speed of working **48,** 192
SIGNALLING.
Submarine signalling by means of sound. J. B. Millet 47, ii, 255
Further results of submarine signalling by means of sound... ... ... J. B. Millet 49, 300
Air signals, untrustworthiness of **47, ii,** 261, 264
Bells used for submarine signalling **49,** 301
Influence of shoal water on submarine signalling ... ... **47, ii,** 267
Number of ships fitted with submarine signalling apparatus **49,** 305
Sound signalling in submarines **47, ii,** 261, 264, 266
Submarine signalling for naval purposes **47, ii,** 264
— — early experiments in ... ... **47, ii,** 256
Trinity House and submarine signalling **47, ii,** 262
South Carolina, U.S.N., superposed turrets ... **53, ii,** 60
SPEED OF SHIPS.
The measurement and automatic recording of dead reckoning ... F. R. S. Bircham 54, 193
Description of a tide indicator. Commander G. J. Baugh 54, 206
Automatic recorder of speed, description of ... **54,** 197
Dead reckoning, measurement of **54,** 193
Depth of water, effect of. *See under* "Resistance of Ships."
Factor of safety in relation to speed ... **47, ii,** 208
SPEED OF SHIPS—*continued.*
Speed of motor boats. *See under* "Yachts (Motor Boats)."
Tide indicator (Lenthall-Baugh), description of **54,** 206
Value of speed in warships. *See under* "Naval Warfare."
Wind, effect of on sea speeds **50,** 111
See also "Horse Power," "Resistance of Ships," and "Trials of Steamers."
STABILITY.
Description of a stability and trim indicator ... ... S. B. Ralston 53, i, 240
Results of calculations regarding the effect of an internal free fluid upon the initial stability and the stability at large angles in ships of various forms ... A. Cannon 54, 124
Beaufoy's experiments on stability **52,** 37
Buoyancy of submarines. *See under* "Submarines."
Mr. A. Denny's stability calculating instrument **53, i,** 245
Dredger *Leviathan*, stability of **51,** 108
Integraph, use of in stability calculations **49,** 200, 209, 217
Internal free fluid, effect of, upon initial stability **54,** 124
Metacentric height of old battleships **47, ii,** 308, 315
Standardisation. *See under* "Testing of Materials."
Steam engines. *See* "Engines."
STEAM PIPES.
Explosions of steam pipes due to water hammer ... ... C. E. Stromeyer 51, 129
Explosions on S.S. *Amsterdam* and S.S. *Bermudian* **51,** 132
Feed pipe explosion on H.M.S. *Blake* **51,** 142
Steamers (merchant). *See* "Mercantile Steamers."
STEEL FOR SHIPBUILDING.
Fractures in large steel boiler plates. J. T. Milton 47, ii, 359
Factors of safety in marine engineering. Professor J. O. Arnold 50, 260
Standardisation: A report of the work done by the Engineering Standards Committee on sections and tests for materials used in the construction of ships and their machinery ... ... Archibald Denny 51, 10
The brittleness of mild steel due to nitrogen C. E. Stromeyer 52, 193
American steel, experiments on ... **47, ii,** 364, 374
Brittleness of steel, causes of ... **47, ii,** 386, 390
— — effect of age upon **52,** 193
Boiler plate, experiments (1900–1904) ... **47, ii,** 362
— — failure due to unequal strains in **47, ii,** 384, 388

STEEL FOR SHIPBUILDING—*continued.*
Cracks in steel plates near manholes **47, ii,** 384, 389
Ferrite and pearlite constituents ... ... **47, ii,** 367
Forgings, treatment and testing of **50,** 281
Distribution of stress in ship's plating, determination by photo-elastic method **53,** 265
Engineering Standards Committee's work, *see under* "Testing of Materials" ... ...
Heat treatment of steel, tests of **50,** 262, 288
— — — Chernoff's views on ... ... **47, ii,** 385
High tensile steel in H.M.S. *Wolf* and S.S. *Lusitania* **49,** 78, 87, 90
Italian steel industry ... ... **53, ii,** 271
Livadia's boiler plates ... ... **47, ii,** 360
Lloyd's rules for testing ship-building materials **47, ii,** 328
Lusitania, steel used in construction of **49,** 67. 78
Mauretania, steel used in riveting **49,** 309
Manganese in mild steel, proportion of **50,** 265, 285
Mechanical treatment of steel, dangers arising from improper ... ... **47, ii,** 386
Micrographic structure of Spencer's steel **47, ii,** 372
Mild steel, stress strain diagrams **50,** 264
Nitrogen and phosphorus in steel plates, table of percentages of **52,** 195, 198
Normalised and annealed steels **50,** 262
Output of steel made in Japan ... ... **53, ii,** 146
Over-annealing, changes due to **50,** 266, 284
Over-heated plates, detection of ... ... **47, ii,** 382
Shearing and punching effects on the material **47, ii,** 386, 389
Silicon steel, use of... ... ... **47, ii,** 385
Tests of steel, recorded photographically ... **54,** 233
Trefilage process of fluid compression ... **47, ii,** 390
Wohler's experiments on steel bars **50,** 269

STEERING AND STEERING GEARS.
Steering-gear experiments on the turbine yacht "Albion."
H. S. Hele-Shaw and F. L. Martineau 53, i, 217
Turning circles ... Professor W. Hovgaard 54, 23
S.Y. *Albion's* steering gear (Hele-Shaw) **53, i,** 217
Drift angles, measurement of **54,** 43
Effect of propeller race on rudder ... **54,** 34, 46
Gyroscope, effect of on steering **49,** 174
Log diagrams with Dr. Hele-Shaw's gear **53, i,** 226
Lusitania, steering trials of **50,** 103
Radius of turning circle, calculation of ... **54,** 33, 37
Rudder pressure, formula for **54,** 26
Selandia, steering-gear on **54,** 85
Thunderer and *Yashima*, trials of **54,** 24
Turning circles of turbine steamers **49,** 273
Variable-stroke pump in Dr. Hele-Shaw's gear ... ... **53, i,** 219, 233
— — — trials of gear at sea ... **53, i,** 222, 233, 237
Stowage. *See* "Cargoes and Stowage."
Strain indicators. *See under* "Strength of Ships."
Stream Lines. *See under* "Resistance of Ships."

STRENGTH OF SHIPS.
The strength of ships, with special reference to experiments and calculations made upon H.M.S. "Wolf" ... Prof. J. H. Biles 47, i, 80
The influence of the proportions and forms of ships upon their longitudinal bending moments among waves ... F. H. Alexander 47, i, 116
Some experiments on structural arrangements in ships ... ... J. Bruhn 47, i, 126
Oil-tight work in ships of light construction. Herbert Rowell 48, 196
Structural development in British merchant ships ... ... J. Foster King 49, 287
A new system of ship construction. J. W. Isherwood 50, 115
The influence of form and bulkheads on the strength of ships ... ... J. Bruhn 51, 233
The influence of longitudinal distribution of weight upon the bending moments of ships among waves ... ... F. H. Alexander 53, i, 103
Considerations affecting local strength calculations ... ... J. Montgomerie 53, i, 118
Determination, by photo-elastic methods, of the distribution of stress in plates of variable section, with some applications to ship's plating ... Prof. E. G. Coker 53, i, 265
Ayre-Ballard method of ship construction **53, i,** 300
Bending moment curves ... ... **53, i,** 111
— — — of the *Wolf* ... ... **47, i,** 85
S.S. *Carbon*, construction of **51,** 233, 250
Cellular double bottoms, introduction of **53, ii,** 153, 160
Cargo steamers, structural changes in **49,** 102
Curved beams, strength of ... ... **53, ii,** 233
Channel frame arrangement, superiority of **47, i,** 154
Deflection determined from bending moment curves ... ... **47, i,** 90
— of H.M.S. *Wolf* ... ... **47, i,** 112
Displacement as a measure of scantlings **53, i,** 114
Distribution of stress in ship's plating, determination by photo-elastic method ... **53, i,** 265
Distribution of strains in ships ... ... **47, i,** 113
Floating docks, stresses in **49,** 251
See also "Docks, Floating."
Experiments on the comparative strength of flanged plates ... ... **47, i,** 131
Formulæ for oblique bending ... ... **47, i,** 144
Experiments on girders under beams ... **47, i,** 133
Graphic construction of moment of weight curve ... ... **53, i,** 113

STRENGTH OF SHIPS—*continued.*
Great Eastern, bending moments **51,** 238
Great Eastern and *Lusitania*, construction of compared **49,** 86, 289, 297
Hammering plates cold, advantage of ... **47, i,** 110
High tensile steel in H.M.S. *Wolf* and S.S. *Lusitania* **49,** 78, 87, 90
Integraph, use of ... ... **47, i,** 85; **49,** 207

History of torpedo-boat development ... 53, ii, 325
Italian torpedo-boats ... ... 53, ii, 263
Kabyle, boilers of 54, 149
Motor torpedo-boat No. 1176 (Yarrow) 48, 97
Ocean-going destroyers and scouts compared 47, i, xliii ; 48, 8, 15
Oil engines for torpedo-boats ... ...49, 4 ; 50, 65

TORPEDO-BOATS AND "DESTROYERS"—*continued.*
"River" class destroyer, speed of **47, ii,** 352 ; **50,** 61
Rolling experiments on German torpedo-boat. *See under* "Gyroscope."
Tartar, H.M.S., speed of **50,** 63, 69, 74
Velox, H.M.S., engines of ... ... **50,** 78 ; **53, ii,** 80
Viper, H.M.S., speed of **50,** 71, 75
Voltigeur, turbines of ... ... **53, ii,** 73, 78
Wolf, H.M.S., experiments on ... ... **47, i,** 80
See also "Strength of Ships" and "Resistance of Ships."
Torsion meters. *See under* "Horse-power."
Training of Engineers. *See under* "Education of Naval Architects and Marine Engineers."
Trafalgar, naval strategy at. *See under* "Naval Warfare."
— warships engaged at. *See under* "Warships."
TRIALS OF STEAMERS.
Alteration of time due to shallow water **47, ii,** 342
Archer, H.M.S., trials with Yarrow superheaters **54,** 161
Ben-my-Chree, trials of **51,** 122
Cossack, trials of. *See under* "Torpedo Boats and Destroyers."
Depth of water to be avoided in trial runs **47, ii,** 349
Kasuga and *Nisshin*, steam trials of ... **47, i,** 52
Lusitania, progressive trials of **50,** 101, 105
— *See also under* "Mercantile Steamers (Mail and Passenger)."
Measured mile, Admiralty action ...**47, ii,** 351, 353
— — minimum depth for ... ... **47, ii,** 352
— — Maplins and Skelmorlie, compared ... **51,** 176
— — off the Goodwins (proposed) ... ...**47, ii,** 354
Method of eliminating indicator diagram errors ... ... **47, ii,** 341
Newhaven, S.S., trials of **54,** 190
Russian Volunteer Fleet, results of trials **47, i,** 71
Scouts, trials of **48,** 3, 8
Speeds at sea and on trial **48,** 15
Stopping trials with turbine steamers, results of **49,** 272, 286
Torsiometers, use of, on trials ... **49,** 121, 129, 133
Turning trials. *See under* "Steering and Steering Gears."
Vespasian, progressive trials of **52,** 170
— results of trials at sea ... ... **53, i,** 30, 32
Viking and *Adder*, Trials of ... ... **47, ii,** 353
Wind, effect of on sea speeds **50,** 111
See also "Horse-Power" and "Speed of Ships."
Tsu Shima, tactics at. *See under* "Naval Warfare."
Tugs. *See under* "Shallow-draught Vessels."
Turbine engines. *See* "Engines (Turbine)."
Turbinia, boiler trials of **54,** 166
Turbinia, particulars of ... ... **53, ii,** 80
Turning circle. *See under* "Steering and Steering Gears."
Twin screws. *See under* "Propellers."

Vacuum augmenter. *See under* "Condensers" and "Engines (Turbine)."
Velox, H.M.S., engines of ... ... **50,** 78 ; **53, ii,** 80
VENTILATION OF SHIPS.
The heating of modern ocean liners. W. Carlile Wallace 50, 138
Electric heating of ships **50,** 141, 149
Observation of temperature on S.S. *Oceanic* and *St. Paul* **50,** 142, 145
Thermotank system of heating and ventilation **50,** 140, 147
Vespasian, geared turbines of. *See under* "Engines (Turbine)."
VIBRATION OF STEAMERS.
A method of preventing vibration in certain classes of steamships ... A. Mallock 47, ii, 227
The vibrations of ships and the use of a dynamical model for determining the elasticity of ships. Professor J. B. Henderson 51, 29
General propositions and diagrams relating to the balancing of the four-cylinder marine engine ... ... C. E. Inglis 53, i, 248
Our present knowledge of the vibration phenomena of steamers Dr. O. Schlick 53, ii, 121
Torsional vibrations of electric shafts of any cross-section and mass distribution, and their application to the vibration of ships. Prof. L. Gümbel. 54, 219
Control gear for cross-channel steamer... **47, ii,** 229
Elastic shafts, vibration of **54,** 219
Four-cylinder engines, balancing of ... **53, i,** 248
Iris, H.M.S., vibration of **51,** 42
Mauretania, vibration of ... **51,** 35, 43 ; **53, ii,** 134
Pallograph for registering vibration **51,** 35, 43 ; **53, ii,** 125
Pathfinder, H.M.S., model experiments on vibration of **51,** 32
Primary and secondary hammering ... **53, i,** 258
Propeller vibration, causes of ... ... **53, ii.** 125
Racing, effect of, on vibration ... ...**47, ii,** 223, 226
Torsional vibration of shafts, frequency of ... **54,** 223
Torsion meters as an aid to solution of vibration problems ... ... **53, ii,** 132
Turbine-engined ships, vibration of ... **53, ii,** 131
Variation of angular velocity of shafts ... **47, ii,** 220
Vibration period proportional to dimensions of structure **54,** 230

VIBRATION OF STEAMERS—*continued.*
Vineta, German cruiser, vibration experiments on **54**, 221, 227
Wolf, H.M.S., vibration of... ... ... **51**, 46
Yarrow, Schlick, Tweedy system ... **53, ii**, 122
Victoria, H.M.S., loss of... ... ... **50 i**,
Victorian, S S. (turbine engined) ... ... **47, i**, xliv.
Victory, H.M.S., particulars of ... ... **47, ii**, 287, 294
Viking, H.M.S., trials of ... ... **47, ii**, 353
Vineta, vibration experiments on **54**, 221, 227
Viper, H.M.S., speed of **50**, 71, 75
Voltigeur, turbines of ... ... **53, ii**, 73, 78
Vulcanus, oil engines of... ... **53, i**, 85, 94 ; **54**, 72

Wake. *See under* "Resistance of Ships."
Waratah, loss of ... ... **53, i**, 246
WARSHIPS.
The ships of the Royal Navy as they existed at the time of Trafalgar.
Sir Philip Watts 47, ii, 285
The influence of machinery on the gun power of the modern warship J. McKechnie 49, 1
A contribution to the history of ironclads (1854-1865) ... ... Earl of Rosse 50, 303
Types of warships omitted in recent programmes of naval construction.
Lord Brassey 51, 1
The battleship of the future.
Rear-Admiral R. H. Bacon 52, 1
The problem of size in battleships.
Professor J. J. Welch 53, i, 1
Warship building (1860-1910).
Sir Philip Watts 53, ii, 291
Some military principles which bear on warship design. Admiral Sir Reginald Custance 54 1
All big gun armament for battleships, drawbacks of **49**, 28
Armament, disposition of **52**, 16
Armour plate for warships. *See under* "Armour."
British battleships (1874–1900) ... ... **53, ii**, 299
Cost of warships .. .. **48**, xliv ; **53, i**, 10
Cost of early warships ... ... **47, ii**, 291, 294, 308
Diesel engines, advantages of, for warships **53, i**, 83
Dreadnought type, advantages of ... **52**, 5, 17
— design of... ... ... **48**, xlii ; **51**, 1, 4
— disadvantages of ... ... **53, i**, 17
— power of, relative to cost ... **53, i**, 14, 22, 25
— table of particulars ... ...**53, ii**, 307, 310
— trials of **49**, 1
Dreadnought and *Invincible* compared ... **53, i**, 19
History of battleship development ... **53, ii**, 35
Increase in size of battleships ... ... **53, i**, 2
Inflexible, anti-rolling tanks on **53, i**, 183, 203, 212, 216

WARSHIPS—*continued.*
Limit of increase in dimensions of warships **53, i**, 12, 22; **53, ii**, 43, 47
Naval officers on warship design ... **47, ii**, 314
Rosse, Lord, correspondence *re* ironclads ... **50**, 303
Oil fuel in warships, storage of **49**, 29
Royal Sovereign (1775), details of ... **47, ii**, 289
Steam *v.* gas-driven battleships **49**, 5
Table of particulars of various battleships **53, i**, 12
Underwater injuries, effect of **50**, 5
Victoria, loss of **50**, 1
Victory, H.M.S., particulars of ... ... **47, ii**, 287, 294
Warrior and *Black Prince*... ... ... **53, ii**, 97, 294
Warship machinery, fifty years' changes in **53, ii**, 96
Warships building in 1805 ... ... **47, ii**, 295
Weight of battleships, distribution of ... **53, i**, 6
— as a percentage of displacement ... **47, ii**, 293
— relative, of armour and armament **54**, 10
WARSHIPS (Cruisers).
The armoured cruisers "Kasuga" and "Nisshin" of the Imperial Japanese Navy.
Colonel N. Soliani 47, i, 43
The Russian Volunteer Fleet.
Herbert Rowell 47, i, 63
The new Scouts Admiral C. C. P. FitzGerald 48, 1
Adventure, *Forward*, *Patrol*, *Sentinel*, table of particulars... ... ... **48**, 2
Amethyst, cruiser, trials of ... ... **53, ii**, 81
Amethyst and *Topaze*, comparative trials **47, i**, xlv
Battle cruisers, table of particulars ... **53, ii**, 323
Early British and foreign cruisers ... **53, ii**, 313
Functions of cruisers **51**, 6
Mercantile cruisers and cruisers, value of compared **49**, 84
See also "Mercantile Cruisers."
Minotaur, speed of... ... ... **48**, 10
Powerful and *Terrible*, functions of **51**, 8
Sapphire and *Amethyst*, compared with scouts... **48**, 7
Scouts, American, features of **48**, 15
— coal supply and endurance of ... **48**, 10, 17
— contract for **48**, 9
— engines of **48**, 2, 8, 13
— sea-going qualities of **48**, 6
— weights of **48**, 2, 8, 13
Value of cruisers for scouting **48**, 12
WARSHIPS (Foreign).
The armoured cruisers "Kasuga" and "Nisshin," of the Imperial Japanese Navy.
Colonel N. Soliani 47, i, 43
The Russian Volunteer Fleet. Herbert Rowell 47, i, 63
Unsinkable and uncapsizable ships of the Goulaeff form and system of construction.
General E. E. Goulaeff 50, 1

WARSHIPS (Foreign)—*continued.*
Progress of naval construction in Japan. Rear-Admiral M. Kondo 53, ii, 50
Fifty years' progress of shipbuilding in Italy. Colonel G. Russo 53, ii, 252
Aki and *Kurama*, particulars of ... ... **53, ii, 54**
All big-gun policy in Italy ... ... **53, ii, 277**
American scouts. *See under* "Warships (Cruisers)."
Chiyoda Gata, first modern Japanese warship **53, ii, 53, 193**
Duilio, particulars of ... ... **53, ii, 259**
Foreign armourclads (1860–73) ... ... **53, ii, 298**
— — (1874–1900) ... ... **53, ii, 302**
"Goulaeff" ship, vulnerability of ... **50, 17, 24**
Henri IV., design of **50, 12**
Italia, particulars of ... ... **53, ii, 264, 278**
Italian armoured cruisers ... ... **53, ii, 272**
— battleships, early examples of ... **53, ii, 258**
— warship building, progress of ... **53, ii, 252**
Japanese warships, engines in ... ... **53, ii, 194**
Kasuga and *Nisshin*, details of weight ... **47, i, 56**
Monitor ships, class of **51, 3, 5**
Orel, *Vladimir*, *Saratov*, *Moskva*, and *Smolensk*, particulars of ... ... **47, i, 66, 75**
Popoffka and *Livadia*, behaviour of at sea **50, 13, 19, 22**
Retvizan, *Borodino*, and *Askold*, performance of **50, 3, 15**
Russian Volunteer Fleet Association ... **47, i, 63**
Shikishima, particulars of ... ... **53, i, 4, 16, 20, 27**
South Carolina's superposed turrets ... **53, ii, 60**
Vittor Pisani, design of ... ... **47, i, 61**
Watertight compartments. *See under* "Bulkheads."
Watertube boilers. *See under* "Boilers."

WAVES.
Diverging waves ... Professor W. Hovgaard 51, 251
Character of waves used in model experiments **47, i, 175**
Diverging waves, table of observations... ... **51, 260**
Effect of waves on freeboard **48, 161, 169**
Effect of waves on moving ships ... **53, i, 199**
Model experiments among artificial waves **47, i, 158; 51, 255**
Stresses on ships among waves. *See under* "Strength of Ships."
Waves due to resistance. *See under* "Resistance of Ships."
Wire ropes in cableways. *See under* "Shipyard Equipment."
Wolf, H.M.S., experiments on. *See under* "Strength of Ships."

WOODEN SHIPS.
Arctic and Antarctic ships. *See under* "Arctic Vessels."
Longevity of old wooden warships ... **47, ii, 290**
Ships engaged at Trafalgar. *See under* "Warships."

WOODEN SHIPS—*continued.*
Viking ships, lines of **49, 287**

YACHTS.
Yacht racing measurement rules and the International Conference ... R. E. Froude 48, 56
Nevada, section of **48, 77**
Registration societies and yachts' scantlings ... **48, 76**

YACHTS (Steam).
Steam yachts: some comparisons. J. R. Barnett 48, 207
S.Y. Albion, steering gear on ... ... **53, i, 217**
Lloyd's Register of yachts ... ... **47, ii, 329**
Total tonnage and value of steam yachts ... **48, 207**

YACHTS (Motor-Boats).
The speed of motor-boats and their rating for racing purposes ... ... Linton Hope 48, 82
The design and construction of high-speed motor-boats ... ... James A. Smith 48, 92
Early motor launches **48, 93**
Efficiency of propellers for motor-boats ... **52, 137**
Hutton II., description of **48, 85**
Legru-Hotchkiss, description of **48, 84**
Marine Motor Association, formation of **48, 86, 93**
Methods of construction and material used for motor launches **48, 98**
Napier I., description of **48, 83**
Restriction of power for rating purposes ... **48, 94**
Vibration of hull in motor-boats... ... **48, 101, 104**
See also under "Engines (Internal Combustion)."

YACHT MEASUREMENT AND TIME ALLOWANCE.
Yacht racing measurement rules and the International Conference ...R. E. Froude 48, 56
The speed of motor-boats and their rating for racing purposes ... ...Linton Hope 48, 82
American formulæ for time allowance ... **48, 62, 69, 75**
Centre-board yachts, provisions for **48, 67**
Element in formula representing resistance to propulsion **48, 79**
English and foreign formulæ compared **48, 69, 73**
Flare of end sections, effect of **48, 63**
Formula settled upon at International Conference (1905) **48, 67**
Freeboard, premium on **48, 65**
Girth difference term, introduction of **48, 59**
International Conference of 1905, proceedings **48, 62**
Measurement formulæ standardised **48, 70**
Motor-boats, rating rule for **48, 87, 101**
— — Time allowance curve for **48, 88**
Table of M.M.A. rating and speed **48, 90**
Tax figures, table of **48, 72**
Yashima, steering trials of **54, 24**
Ypiranga, S.S., rolling of ... ... **53, i, 186**
